

PROFILE OF INTERNATIONAL STUDENTS AND SCHOLARS FALL SEMESTER 2007

Office of International Students & Scholars
International Programs

International Programs enables University of Iowa students, faculty, staff and the public to learn from and about the world. Its offices, degree programs and events provide life-changing opportunities on campus and abroad, heighten intellectual and cultural diversity, and give all University constituents access to vital international knowledge.

Dr. William Reisinger, *Associate Provost and Dean of International Programs*
Dr. Downing Thomas, *Associate Dean of International Programs*
Dr. Diana K. Davies, *Director, International Programs*

Fax 319-335-2021

Students and scholars from other countries are an important component of The University of Iowa, and contribute significantly to teaching, research, and other scholarly activities throughout UI. This is the third annual report on the international students and scholars who are members of The University of Iowa community. This statistical analysis of this population is but one way to document the impact of this component of international education and demonstrate the global reach of The University of Iowa.

While this report has been compiled by the Office of International Students and Scholars, many other offices have provided us with data that is included in the publication. Particularly, the Office of the Registrar, the Faculty and Staff Immigration Services unit of Human Resources and the Office of Admissions have contributed significant pieces of information, and we thank them for their efforts and support.

The University of Iowa, like all higher education institutions in the United States, faces many challenges in continuing to attract the best and brightest of the world to our classrooms and laboratories. We have to counteract incorrect impressions about the visa process and perceived unfriendliness in the United States. No longer can we count on students coming to the University solely on our academic reputation—we must actively recruit international students at all levels to our institution.

Questions on the information included in this report, or suggestions on ways to improve future editions, can be addressed to Scott King, Director, Office of International Students & Scholars at 319-335-0335 or scott-king@uiowa.edu.

Unless otherwise noted, statistics define "international student" as reported for the national "Open Doors" census conducted by the Institute of International Education. While the Open Doors definition has gone through minor changes over the years, use of the Open Doors definition allows us to compare statistics for The University of Iowa with those of other institutions and with national trends.

Readers should note that the reports prepared by the Office of the Registrar for the Iowa Board of Regents enumerates international students according to a different, Board of Regents approved, definition.

THE UNIVERSITY OF IOWA INTERNATIONAL STUDENT POPULATION

FALL 2007

2007 International Student Census

| | |
|--|--------------|
| Enrolled students..... | 1,968 |
| Students in post-graduation training..... | 191 |
| International Student Census Total..... | 2,153 |

The term "international student" encompasses any student enrolled at UI who is neither a U.S. citizen nor a permanent resident. In addition to those individuals who entered the U.S. on student visas, this population includes students in dependent, working, and other non-educational immigration statuses. The national census of international students also enumerates those who have completed their educational programs and are in a period of approved post-graduation training.

International Student Enrollment by Level of Study

The Economic Impact of the International Student Population

With few exceptions, international students are classified as non-residents for tuition purposes. Thus, the annual 2-semester budget for a typical undergraduate international student is nearly \$28,000. The estimate for a graduate student paying out-of-state tuition is approximately \$28,000; a graduate assistant (who qualifies for in-state rates as part of the benefits of this appointment) has a budget of \$16,000. Professional programs are typically more expensive, with the MBA budget of \$35,800 and College of Law costs of \$43,600 for nonresident students. These estimates include two semester's tuition and books and 12 months of typical living and personal expenses.

NAFSA: Association of International Educators compiles annual statistics on the economic impact of international students, taking into account typical levels of US support, dependents present in the US, and other factors that influence spending of international students. According to this estimate, international students at The University of Iowa contribute nearly **\$37,900,000** per year to the local economy.

The same report estimates the economic impact of international students for the entire State of Iowa in excess of \$144,000,000 and nationwide to be nearly \$13 billion.

Dependents of International Students

The University's international community includes 434 dependents in derivative immigration status (F-2 or J-2), accompanying 325 international students at The University of Iowa. This tally of 289 spouses and 145 dependent children does not include the many married couples who are both students, the numerous U.S. born children of international students who derive U.S. citizenship from their birth, or the increasing number of unmarried partners and parents who are a part of international student households (the latter two categories enter the U.S. as visitors as U.S. immigration law does not accord them dependent immigration status).

Ages of Dependent Children

- 5 and under: 17.2%
- 6-10: 41.4%
- 10-15: 20.0%
- 16-20: 21.4%

Gender of Students with Accompanying Dependent Spouse

- Male: 75.4%
- Female: 24.6%

10 YEAR TRENDS OF THE INTERNATIONAL STUDENT POPULATION

International Student Enrollments at The University of Iowa and Nationwide

The chart below gives a 10 year synopsis of international student enrollments (as reported via the Open Doors census) for The University of Iowa and all U.S. colleges and universities.

| | 1997 | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 |

| U.S. Total | 481,280 | 490,934 | 514,726 | 547,867 | 582,323 | 586,323 | 572,509 | 565,039 | 564,766 | n/a | n/a |

Percentage Change in International Student Populations

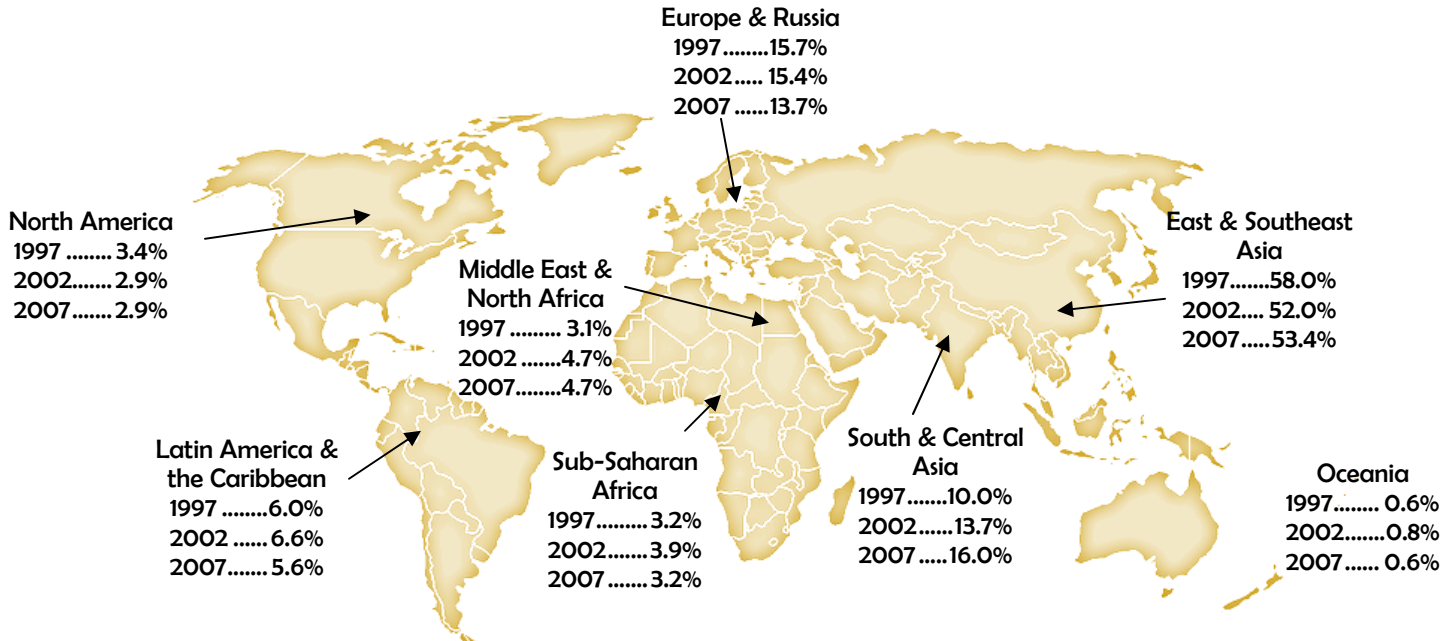

The chart at left shows the percentage growth in UI and US international student populations, with 1997 as the base year. Due partly to recent national declines in international student numbers, UI has seen slightly more growth than national trends, but the now declining UI numbers is closing the gap.

(only programs with 10 or more graduate students are included in this chart)

Primary Source of Funding* (F-1 and J-1 status degree seeking students only)

Master's Students

Doctoral Students

*The above data indicates the greatest source of support for students' educational and living expenses. An additional 3.6% of graduate and professional students, who are accompanied by dependents, receive significant support from the University such as a graduate assistantship yet are listed as having another source of support, generally personal or family, as their primary source as the assistantship covers less than 50% of their total anticipated expenses.

Largest National Representations

- China (PRC) (56 scholars)
- Korea, Rep. of (52 scholars)
- India (31 scholars)
- Germany (16 scholars)
- Japan (15 scholars)
- Russia (14 scholars)
- France (13 scholars)

Primary Source of Funding for J-1 Scholars*

| | |
|--|-------|
| University Employment..... | 53.8% |
| Personal or Other Private Support..... | 33.0% |
| Home Government Support..... | 13.1% |

*Funding information is provided for J-1 scholars only, as all H-1B scholars must be paid University employees as a condition of that immigration status.

EXPLANATION OF TERMS USED IN THIS PROFILE

International Student. An international student is any individual enrolled in fall 2007 classes at The University of Iowa who has self-identified as having neither U.S. citizenship nor permanent residence. In addition to students who are here in an F-1 or J-1 educational immigration status, students who hold immigration statuses unrelated to study, such as temporary workers, are included. In accordance with national data collection standards, students who have graduated and are in an immigration-approved “practical training” period are also included in the University’s count of international students.

International Scholar. An international scholar is an academic professional who is at the University in a J-1 or H-1B immigration status. A scholar may be employed by UI, or may be here in a visiting capacity under the sponsorship of a UI academic department.

Immigration Status. While international students and scholars have a variety of non-immigrant statuses, the following are those which are directly related to their presence at The University of Iowa:

- **F-1: student.** This is the most common status for an individual who is coming to the U.S. for the purpose of study.
- **J-1: exchange visitor.** Exchange visitors can be students or scholars. Students in this status typically, but not exclusively, are here through a University exchange program or are receiving funding from their home government or the U.S. government. Scholars in this status may be at the University as unpaid scholars (often applicable to those who are on sabbatical at their home institution) or may be UI employees in short-term, temporary positions.
- **H-1B: temporary worker.** This status is obtained by the University for non-citizen employees who are in professional or technical positions, including teaching faculty. An H-1B worker is likely to be employed in a longer-term position than a J-1 exchange visitor.

Countries and Territories. This report uses the U.S. State Department listing of independent countries and dependencies. The regional breakdown follows the guidelines of the “Open Doors” report published by the Institute of International Education.

Level of Study.

- Undergraduate students are those enrolled in a program of study leading to no higher than a baccalaureate degree.
- Graduate students are those enrolled in post-baccalaureate study, with the exception of those whose programs are designated as “professional.” Masters and doctoral students are included, as well as students working on post-baccalaureate certificates and post-doctoral scholars.
- Professional students are those in the MBA, DDS, JD, LLM, MD, and PharmD programs as well as medical residents and fellows.

College of Study. In accordance with official reports from the Office of the Registrar, this analysis of international students by college enumerates students in the colleges in which their programs are taught, and not which college administers their major. For example, most graduate programs are administered through the Graduate College, yet these students are counted in the college of their major. A number of highly interdisciplinary programs that cannot be placed in a single college are those included in the category of “graduate college interdisciplinary programs.”
