

Profile of International Students & Scholars

Fall Semester 2011

INTERNATIONAL PROGRAMS

1111 University Capitol Centre
Iowa City, Iowa 52242-500
319-353-2700

In today’s world, it is not sufficient for a university to be solely recognized within its borders; an international reputation is the mark of a truly outstanding institution. One indication of a university’s global influence is the students and scholars it attracts from around the world. This statistical analysis will give readers some idea of the breadth and depth of our international population, members of which are present in nearly every academic component of The University of Iowa.

The University of Iowa has a renewed commitment to increased internationalization throughout the campus, and our growing numbers of international students are a reflection of efforts at many levels of the institution. However, like all higher education institutions in the United States, we face many challenges in continuing to attract the best and brightest of the world to our classrooms and laboratories. In spite of major, positive changes in government policies and a significant public relation effort on the part of the US government, we still have to counteract incorrect impressions about the visa process and perceived unfriendliness in the United States. With competition from universities from Australia, the UK, Canada, the Netherlands, France and many other nations, no longer can we count on students coming to the University solely on our academic reputation—we must continue to actively recruit international students at all levels to our institution and to provide the services and supportive atmosphere that are vital to students’ success and happiness.

Much more information on international students is available and an queries on specific populations, questions on the information included in this report, or suggestions on ways to improve future editions, can be addressed to Downing Thomas, Associate Provost and Dean of International Programs, at 319-353-2700 or downing-thomas@uiowa.edu.

Explanation of Terms Used in This Profile15

Unless otherwise noted, statistics define “international student” as reported for the national “Open Doors” census conducted by the Institute of International Education. Use of the Open Doors definition allows us to compare statistics for The University of Iowa with those of other institutions and with national trends.

Readers should note that the reports prepared by the Office of the Registrar for the Iowa Board of Regents enumerates international students according to a different, Board of Regents approved, definition.

University of Iowa International Students

Fall 2011 Enrollment Statistics

International Student Census	3,463
Enrolled students.....	3,275
<i>Undergraduate students</i>	<i>1,734</i>
<i>Graduate students</i>	<i>1,266</i>
<i>Professional program students</i>	<i>275</i>
Students in post-graduation training.....	188

New International Students	855
Undergraduate students.....	603
<i>First year undergraduate students</i>	<i>484</i>
<i>Transfer undergraduate students</i>	<i>119</i>
Graduate students	205
Professional program students.....	47

Students at international student orientation.

International Students as Percentage of Overall Student Enrollment

All University students	10.5%
<i>Undergraduate students</i>	<i>8.2%</i>
<i>Graduate students</i>	<i>22.5%</i>
<i>Professional program students</i>	<i>6.9%</i>
New first year undergraduate students	10.6%
New undergraduate transfer students.....	7.7%
New graduate students	21.2%
New professional program students	7.3%

This report uses the term international student as defined for the national Open Doors census conducted by the Institute of International Education. Included in the count is one enrolled student who is neither a US citizen nor permanent resident, plus those students in F-1 or J-1 immigration status who are in an authorized period of post-graduation training. Reports prepared by the Registrar's Office for the Iowa Board of Regents use a different definition.

<u>Gender</u>	<u>Average Age</u>
Undergraduate	Undergraduate: 20.4

Each year, NAFFSA: Association of International Educators, estimates the **economic impact** of international students through a formula which takes into account tuition charges and typical living costs, as well as financial assistance that is provided by the institution. The national impact is in excess of \$20 billion; the estimate for the State of Iowa is over \$280 million. The estimated financial contribution provided by University of Iowa international students has grown to over \$83 million annually.

Teaching Intercultural Skills and Understanding

A major priority of International Programs is providing programming and training. These offerings are given at multiple levels to help develop a community that respects and has the necessary skills to accommodate the diversity these students bring with them. Each year, over 5,000 students, scholars, faculty and staff participate in these programs.

Student offerings include new student orientations, the Life in Iowa extended orientation series, Bridging Global and Domestic Diversity (leadership training for international and domestic students), taxation workshops, and sessions on U.S. employment. OISS also offers support and resources to student organizations that share internationalization goals, such as the

Organization for the Active Support of International Students (OASIS), UI Student Ambassadors, and the many nationality and intercultural cultural student association.

The growing international student population has increased the need for staff throughout the university to be trained in intercultural skills, and this training is provided through the Building Our Global Community workshop series and other specialized programs. Over 550 UI employees have participated in BGC since its inception in 2004.

Our reach extends beyond the campus to Iowa City and beyond. IP works with community organizations such as Friends of International Students and the International Women's Club

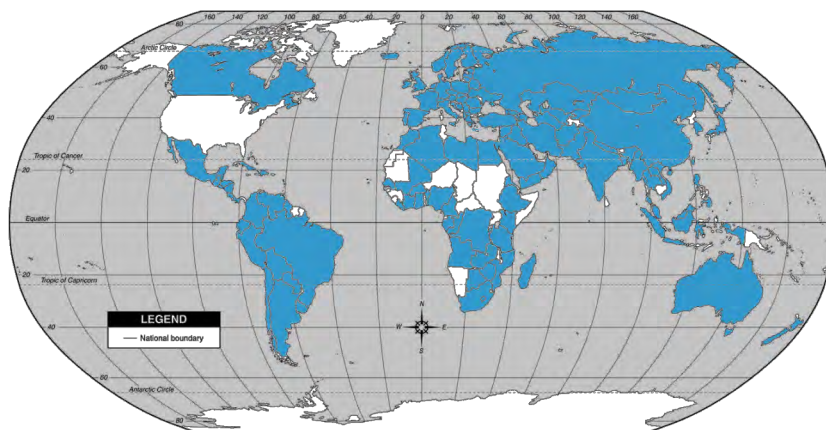

to provide local hospitality. Going Global in Iowa is an initiative to provide fee-for service intercultural training to outside businesses and organizations. All these activities contribute to the expansion of international awareness and provide support for UI students and scholars.

Nationalities of International Students & Scholars

2001-2011

The map at the right indicates the 157 countries and territories from which the University has enrolled at least one student or hosted one visiting scholar in the past ten years. These range alphabetically from Afghanistan to Zimbabwe; in physical size from Bermuda to Russia; and in population from St. Kitts & Nevis to China.

Student Advising

An important function of International Programs is providing one-on-one assistance with the many specialized needs of international students. International Student & Scholar Advisors, trained in student immigration law and intercultural communications skills, address needs which range from questions about legal regulations to cultural adjustment and homesickness. The growth in international students and the change from a largely graduate to a majority undergraduate student have resulted in both more advising visits and a change in primary focus of advising sessions.

Immigration Processing

International Programs is responsible for the University's immigration compliance related to its permission to enroll students and scholars. Such events as registration, course completion, major and degree changes, and addresses must be timely reported. As the population grows, so does the number of reportable events.

Since the implementation of the Student and Exchange Visitor Information System (SEVIS) government database in 2003, UI has submitted over 100,000 events. These include:

Record creation:	15,800 events
Name or address updates:	30,000 events
Semester registration verifications:	28,000 events
Approve academic internships:	1,900 events
Major or program change:	8,700 events

Approximate number of SEVIS events per year:

2006-2007:	9,800
2007-2008:	9,700
2008-2009:	10,900
2009-2010:	12,400
2010-2011:	15,000

International Alumni Connections

The Alumni Association currently has international Iowa Clubs in China, Costa Rica, Ecuador, Hong Kong, Iceland, Israel, Malaysia, Mexico, Singapore, South Korea, Sweden, Taiwan, Thailand, Turkey and Venezuela.

2009-2010:	431 scholars
2010-2011:	408 scholars

Many scholars come with families, and OISS and affiliated organizations provide outreach and support for these dependents

1971 to 2011—40 Years of Service to Our International Community

In 1971, The University of Iowa established the Office of International Education Services, providing centralized services for international students attending the institution. This office later became the International Students and Scholar Services unit of International Programs, thus 2011 marks 40 years of assistance to students and scholars from around the world. This page provides basic statistics on students for fall 1971 and in 10 year intervals thereafter. *Please note that definitions may have changed over the years; these charts attempt to standardize them as closely as possible.*

International Student Enrollment Trends, 1950 to Present

Explanation of Terms Used in This Profile

International Student. An international student is any individual enrolled in fall 2010 classes at The University of Iowa who has self-identified as having neither U.S. citizenship nor permanent residence. In addition to students who are here in an F-1, M-1 or J-1 educational immigration status, students who hold immigration statuses unrelated to study, such as temporary workers, are included. In accordance with national data collection standards, students who have graduated and are in an immigration-approved “practical training” period are also included in the University’s count of international students.

International Visiting Scholar. An international scholar is an academic professional who is at the University in a J-1 immigration status. A scholar may be employed by UI, or may be here in a visiting capacity under the sponsorship of a UI academic department. Individuals in J-1 status who are in a student or medical resident category are excluded from this count.

Immigration Status. While international students and scholars have a variety of non-immigrant statuses, the following are those which are directly related to their presence at The University of Iowa:

- F-1: student. This is the most common status for an individual who is coming to the U.S. for the purpose of study.
- J-1: exchange visitor. Exchange visitors can be students or scholars. Students in this status typically, but not exclusively, are here through a University exchange program or are receiving funding from their home government or the U.S. government. Scholars in this status may be at the University as unpaid scholars (often applicable to those who are on sabbatical at their home institution) or may be UI employees in short-term, temporary positions.

Countries and Territories. This report uses the U.S. State Department listing of independent countries and dependencies. The regional breakdown follows the guidelines of the “Open Doors” report published by the Institute of International Education.

Level of Study.

- Undergraduate students are those enrolled in a program of study leading to no higher than a baccalaureate degree.
- Graduate students are those enrolled in post-baccalaureate study, with the exception of those whose programs are designated as “professional.” Masters and doctoral students are included, as well as students working on post-baccalaureate certificates and post-doctoral scholars.
- Professional students are those in the MBA, DDS, JD, LL.M, MD, and PharmD programs as well as medical residents and fellows.

College of Study. In accordance with official reports from the Office of the Registrar, this analysis of international students by college enumerates students in the colleges in which their programs are taught, and not which college administers their major. For example, most graduate programs are administered through the Graduate College, yet these students are counted in the college of their major. A number of highly interdisciplinary programs that cannot be placed in a single college are those included in the category of “graduate college interdisciplinary programs.”
