	<p>Developing IS Honors sections is problematic without IS faculty -- competition with CLAS, etc. We need a budget for incentives if IP wants to encourage the development of honors courses with international content within departments as there is no current incentive. The curriculum development grant does offer an honors section option.</p>
	<p>Can explore development of new faculty-led study abroad programs. Some existing faculty-led programs have been approved for this already.</p>
	<p>How to increase international content in courses we don't control? Must be involved in the GE revision process. Once could lobby for a new "international" category, but that doesn't necessarily get to the full scope of internationalization. Perhaps we can create a separate category within the CD awards that favors international content in new or revised GE courses, specifically.</p>
