Choosing to Die:

A Global Look at the Impact of Cultural Norms on the Choices Women Make in Cancer Treatment

Tuesday, April 24 | 3 – 4:30 pm | 1117 University Capitol Centre

The following panel will discuss details of their recent international, inter-disciplinary pilot study focused on the hurdles women across Asia seem to face when diagnosed with breast cancer.

Dr. Mikael Hartman
senior consultant, Division of General Surgery (breast surgery),
National University Hospital Singapore
head of the Breast Cancer Prevention Program,
Saw See Hock School of Public Health, National University of Singapore

Prof. Wong Mee Lian
professor of public health, Saw See Hock School of Public Health and Yong Loo Lin School of Medicine, National University of Singapore

Ms. Jenny Liu
manager of the Breast Cancer Prevention Program,
Saw See Hock School of Public Health, National University of Singapore

Dr. Miriam Zeitzen
anthropologist, modern history, and world cultures
National Museum of Denmark

Prof. Cynthia Chou
professor of anthropology
C. Maxwell and Elizabeth M. Stanley Family chair of Asian Studies, University of Iowa

Panel discussion moderated by:
Dr. Resmiye Oral
director, Child Protection Program, and clinical professor of pediatrics, Carver College of Medicine

Event sponsored by International Programs, the Stanley-UI Foundation Support Organization, Center for Asian and Pacific Studies and Department of Anthropology.
