The International Hawkeye Service Team program is a service-learning based experience open to students from all majors. Students will spend 18 days (May 15 – June 2) in the Dominican Republic engaging in service activities, visiting local government offices, nonprofits, and organizations already working in the community. The 2018 program will focus on education and eco-tourism, with opportunities to learn about other fields of interest such as business, public health, youth development/recreation, and agriculture. No previous experience is required.
