Dutch Spatial Planning
Wil Zonneveld, Professor of Urban and Regional Development,
Delft University of Technology, The Netherlands

Thursday, April 9, 2009
4:15 – 5:15 pm
W401 Pappajohn
The University of Iowa

This lecture will explore the system of spatial planning in The Netherlands. It will provide a brief historical sketch about how that system developed, and then explore critical issues in current Dutch planning, including preparing for future floods.

It will be followed by a second lecture on Friday, April 10, in which Zonneveld will discuss the discourse on European territorial governance. This will be presented to the European Studies Group and will take place from 4:00 to 5:30 pm in 2520D UCC (Old Capitol Mall). All are invited.

Zonneveld’s visit continues a series of visits by European planning professors that has included Bent Flyvberg (2004) and Ole Jensen (2007).

Co-sponsors: The European Studies Group, the Graduate Program in Urban & Regional Planning, and the Office of International Programs

A reception will be held immediately following Prof. Zonneveld’s presentation
