Profile of International Students and Scholars
Fall Semester 2005

Office of International Students & Scholars
International Programs

The University of Iowa
Students and scholars from other countries are an important component of The University of Iowa, and contribute significantly to teaching, research, and other scholarly activities throughout UI. This is the first of what is planned to be annual reports on the international students and scholars who are members of The University of Iowa community. This statistical analysis of this population is but one way to document the impact of this component of international education and demonstrate the global reach of The University of Iowa.

While this report has been compiled by the Office of International Students and Scholars, many other offices have provided us with data that is included in the publication. Particularly, the Office of the Registrar, the Immigration Services unit of Human Resources and the Office of Admissions have contributed significant pieces of information, and we thank them for their efforts and support.

The University of Iowa, like all higher education institutions in the United States, faces many challenges in continuing to attract the best and brightest of the world to our classrooms and laboratories. The impact of tightening immigration rules and negative attitudes towards the U.S. has resulted in fewer students and scholars applying to our institution. Hopefully, recent events which have begun to ease the visa process and welcome students for their contributions will turn around this trend.

Questions on the information included in this report, or suggestions on ways to improve future editions, can be addressed to Scott King, Director, Office of International Students & Scholars at 319-335-0335 or scott-king@uiowa.edu.

Scott E. King

Unless otherwise noted, statistics define “international student” as reported for the national “Open Doors” census conducted by the Institute of International Education. While the Open Doors definition has gone through minor changes over the years, use of the Open Doors definition allows us to compare statistics for The University of Iowa with those of other institutions and with national trends.

Readers should note that the reports prepared by the Office of the Registrar for the Iowa Board of Regents enumerates international students according to a different, Board of Regents approved, definition.

- **Dentistry**: 0.9%
- **Engineering**: 10.9%
- **Graduate College Only**: 16.8%
- **MBA Programs**: 163 students
- **Chemistry**: 66 students
- **Civil & Environmental Engineering**: 50 students
- **Actuarial Science**: 47 students
- **Pharmacy (Ph.D)**: 47 students

#### Who is an “International Student?”

An international student is defined as an individual enrolled at The University of Iowa who has self-identified as being neither a U.S. citizen nor permanent resident. Included are students who are here in an educational immigration status (such as F-1 and J-1) as well as those who hold other immigration statuses unrelated to study, such as temporary workers.

For national reporting purposes, students who have graduated and are in an immigration-approved “practical training” period are also included in the University’s count of international students. Unless otherwise noted, all statistics in this report are based upon this definition of “international student.”

The total international student enrollment of The University of Iowa in fall 2005 declined for the first time since 1998, with 3.7% fewer students than enrolled in the fall 2004 semester.

Declining international student applications and enrollments have been a national trend since 2003, with 3.6% fewer international students enrolled fall 2004 than two years earlier.

#### Most Common Majors

**Undergraduate**
- Pre-business (39 students)
- Accounting (14)
- International Studies (12)
- Psychology (10)
- Finance (10)

**Graduate & Professional**
- MBA Programs (163 students)
- Chemistry (66)
- Civil & Environmental Engineering (50)
- Actuarial Science (47)
- Pharmacy (Ph.D) (47)

#### Degree Status of Undergraduate International Students

- **Degree Programs**: 77.6%
- **Intensive English Study**: 13.8%
- **Non-degree Visiting Students**: 8.5%

Primary Source of Funds for Study and Living Expenses (F-1 and J-1 Students)

The above data indicate the primary source of support for students’ educational and living expenses. Only students in F-1 or J-1 status are included in this determination. About 3% of graduate and professional students, who are accompanied by dependents, receive significant support from the University such as a graduate assistantship yet are listed as having another source of support, generally personal or family, as their primary source as the assistantship covers less than 50% of their total anticipated expenses.

What It Costs an International Student to Attend UI

The annual 2-semester budget for an undergraduate international student (paying out-of-state fees) is nearly $27,000. The estimate for a graduate student paying out-of-state tuition is approximately $27,100, while a student who qualifies for in-state rates (i.e., a graduate assistant) has a budget of $15,700. Professional program estimates vary widely, with MBA budgets of $33,600 (out-of-state) and $23,000 (in-state) and College of Law costs of $42,600 (out-of-state) and $27,300 (in-state).

Estimates include two semester’s tuition and books and 12 months of typical living and personal expenses.

Dependents of International Students

485 dependents in derivative immigration status (F-2 or J-2) accompany 348 international students at The University of Iowa. The tally of 313 spouses and 172 dependent children does not include the many married couples who are both students, the numerous U.S. born children of international students who derive U.S. citizenship from their birth, or the increasing number of unmarried partners and parents who are a part of international student households (the latter two categories enter the U.S. as visitors as U.S. immigration law does not accord them dependent immigration status).

All but one student who has accompanying dependents is studying at the graduate or professional level.

Ages of dependent children

5 and under: 27.3%  
6-10: 33.1%  
11-15: 28.5%  
16-20: 11.1%  
Average age: 9

Gender of students with accompanying dependent spouses

The international enrollment figures for fall 2005 in the charts below were obtained either directly from the international student office of the relevant institution or from an official report on the university website. The total enrollment figures were all obtained from official enrollment reports posted on the university website.

The current University strategic plan includes the goal of increasing our international student population to the 9% level, which would place us near the average of the public Big Ten institution.

### International Enrollment Comparisons, Fall 2005

| University of Arizona | Undergraduate | 834 28,462 2.9% | Graduate and Professional | 1,612 8,574 18.8% | Total | 2,446 37,036 6.6% |

The Open Doors definition of “international scholar” includes all academic professionals who are in a nonimmigrant status that pertains to their employment or other activity at UI. This population thus encompasses no only the shorter-term J-1 scholar, but also individuals in the often longer-term H-1B, O-1 and TN employment-based immigration statuses.

Scholar’s Personal Funds: 14.8%
Home University or other Organization: 20.0%
Scholar’s Home Government: 8.4%
University of Iowa Employment: 54.8%
Other: 2.0%

All H-1B, O-1 and TN scholars must be employees of the University.
**International Student.** An international student is any individual enrolled in fall 2005 classes at The University of Iowa who has self-identified as having neither U.S. citizenship nor permanent residence. In addition to students who are here in an F-1 or J-1 educational immigration status students who hold immigration statuses unrelated to study, such as temporary workers, are included. In accordance with national data collection standards, students who have graduated and are in an immigration-approved “practical training” period are also included in the University’s count of international students.

**International Scholar.** An international scholar is an academic professional who is at the University in a J-1, H-1B, O-1 or TN immigration status. A scholar may be employed by UI, or may be here in a visiting capacity under the sponsorship of a UI academic department.

**Immigration Status.** While international students and scholars have a variety of non-immigrant statuses, the following are those which are directly related to their presence at The University of Iowa:

- **F-1:** student. This is the most common status for an individual who is coming to the U.S. for the purpose of study.
- **J-1:** exchange visitor. Exchange visitors can be students or scholars. Students in this status typically, but not exclusively, are here through a University exchange program or are receiving funding from their home government or the U.S. government. Scholars in this status may be at the University as unpaid scholars (often applicable to those who are on sabbatical at their home institution) or may be UI employees in short-term, temporary positions.
- **H-1B:** temporary worker. This status is obtained by the University for non-citizen employees who are in professional or technical positions, including teaching faculty. An H-1B worker is likely to be employed in a longer-term position than a J-1 exchange visitor.
- **O-1:** extraordinary worker. Exceptionally qualified aliens may qualify for O-1 status, which provides employment opportunities similar to H-1B status but with fewer restrictions.
- **TN:** Canadian and Mexican professionals in certain areas of expertise may work in this status under the North American Free Trade Agreement.

**Countries and Territories.** This report uses the U.S. State Department listing of independent countries and dependencies. The regional breakdown follows the guidelines of the “Open Doors” report published by the Institute of International Education.

**Level of Study.**

- Undergraduate students are those enrolled in a program of study leading to no higher than a baccalaureate degree.
- Graduate students are those enrolled in post-baccalaureate study, with the exception of those whose programs are designated as “professional.” Masters and doctoral students are included, as well as students working on post-baccalaureate certificates and post-doctoral scholars.
- Professional students are those in the MBA, DDS, JD, LLM, MD, and PharmD programs as well as medical residents and fellows.

**College of Study.** In accordance with official reports from the Office of the Registrar, this analysis of international students by college enumerates students in the colleges in which their programs are taught, and not which college administers their major. For example, most graduate programs are administered through the Graduate College, yet these students are counted in the college of their major. A number of highly interdisciplinary programs that cannot be placed in a single college are those included in the category of “graduate college only programs.”
The Office of International Students and Scholars is a unit of UI International Programs, which consists of a number of offices, centers, degree programs, academic programs, research projects and services. Organized under the associate provost and dean of International Programs, these units serve to further internationalize the campus and the community and promote global scholarship, research and teaching.
