THE HUMAN BODY AND MIND: ENDANGERED ECOSYSTEMS?

4:30 p.m. Wednesday, March 9 • 1117 University Capitol Centre

Michael Bess will address the ethical and social implications of new technologies for human biological enhancement and how, over the coming decades, these technologies will reach into our lives with increasing force. He argues that it is likely they will shake the moral foundations on which contemporary civilization rests, and raise profound questions about what it means to be human.

Bess is Chancellor’s Professor of History at Vanderbilt University in Nashville, Tenn.

This event is free and open to the public. For more information, contact Michel Laronde at michel-laronde@uiowa.edu or 319-335-2264.
